		KPI
a)	Name of the indicator	
	Title of the indicator	
b)	Description of the indicator	
	In order to avoid ambiguity, how can	
	you describe in detail the indicator?	
c)	Related performance dimension	
	Relevant expected outcome the	
	indicator is meant to measure	
d)	Calculation method	
	In the case of a quantitative indicator,	
	how is it calculated? What is the	
	formula/scale and the measurement	
	unit?	
e)	Rationale (relevance)	
	To what extent does the data satisfy	
	information demand?	
t)	Link to other indicators (to be read	
	as link to the KPIs measuring the	
	related other expected outcomes)	
	What are the linkages between this	
	indicator and others?	
9)	Type of indicator	
	(One indicator might fall under more	
	than one typology)	
	Composite indicators, Structural	
	indicators, Process indicators, Outcome indicators, Effectiveness	
	•	
	indicators, Efficiency indicators, Objective indicators, Subjective	
	indicators, Quantitative indicators,	
	Compliance/Implementation	
	indicators, Leading indicator, Lagging	
	indicators, Leading Indicator, Lagging indicators, KPIs to measure Customs	
	performance/KPIs aimed at	
	portornance/N is aimed at	

measuring the application of WCO tools h) Source of verification (SoV) - Where and how the information about the indicator can be obtained (data source) - Administrative records, special studies, sample surveys, observation, etc) and/or the available documented source (e.g. progress reports, project accounts, official statistics, etc.). - Primary or secondary data i) References to existing databases and metadata (non-mandatory) Internal/external databases j) Minimum recommended periodicity When/how regularly it will be measured (e.g. monthly, quarterly, annually, etc.). k) Disaggregation If applicable (e.g. by gender, income group, etc.) 1) Target value (non-mandatory) - Given by standards/benchmarks - Targets help define, in specific and measurable terms, the desired outcomes m) Country example (non-mandatory) Similar indicator used by Member n) Disclosure policy - Accountability preferences to restricted users/public domain. The intended use and disclosure of the		management that application of MOO	
h) Source of verification (SoV) - Where and how the information about the indicator can be obtained (data source) - Administrative records, special studies, sample surveys, observation, etc.) and/or the available documented source (e.g. progress reports, project accounts, official statistics, etc.), - Primary or secondary data i) References to existing databases and metadata (non-mandatory) Internal/external databases j) Minimum recommended periodicity When/how regularly it will be measured (e.g. monthly, quarterly, annually, etc.). k) Disaggregation If applicable (e.g. by gender, income group, etc.) l) Target value (non-mandatory) - Given by standards/benchmarks - Targets help define, in specific and measurable terms, the desired outcomes m) Country example (non-mandatory) Similar indicator used by Member n) Disclosure policy - Accountability preferences to restricted users/public domain. 		results: Country (i.e. Customs) or	
Union level/WCO level/Public level		Union level/WCO level/Public level	

 Where does the information deriving from the measurement process using this indicator appear/where is it communicated? Possibility to disclose detailed or only aggregated data (specify criteria for aggregation, e.g. minimum number 	
of countries, etc.)	
o) Other considerations (e.g.	
limitations) (non-mandatory)	
Indicator proposed as a proxy in	
absence of feasible alternative	
measurements, etc.	
What are the legal constraints	
regarding data collection, acquisition	
and use?	
To what extent do current data	
sources meet user requirements?
